HELIUM PLASMA ISSUE

P. W. J. M. Boumans	1	Editorial
	3	Curriculum vitae: Dr Nicolò Omenetto
J. W. Carnahan	5	Foreword
L. K. Olson and J. A. Caruso	7	The helium microwave-induced plasma: an alternative ion source for plasma mass spectrometry
S. R. Goode and J. N. Emily	31	Measuring the spatial distribution of properties and species in microwave-induced helium plasmas
M. W. Blades	47	Atmospheric-pressure, radio frequency, capacitively coupled helium plasmas
R. Pereiro, Min Wu, J. A. C. Broekaert and G. M. Hieftje	59	Direct coupling of continuous hydride generation with microwave plasma torch atomic emission spectrometry for the determination of arsenic, antimony and tin
G. L. Long, G. R. Ducatte and E. D. Lancaster	75	Helium microwave-induced plasmas for element specific detection in chromatography
M. R. Joseph, Ning Xu and V. Majidi	89	Time-resolved emission characteristics and temperature profiles of laser-induced plasmas in helium
P. G. Brandl and J. W. Carnahan	105	Charge transfer in analytical helium plasmas
	i	*Manuscript Requirements*
	xi	*Spectrochimica Acta Electronica Aims and Scope*
	xiii	*Notes for Contributors*

No. 2

M. P. Dziewatkoski and C. B. Boss	117	A study of hydrocarbon dissociation in a microwave induced plasma sustained in Ar gas
Min Wu, Yixiang Duan, Qinhan Jin and G. M. Hieftje	137	Elemental mass spectrometry using a helium microwave plasma torch as an ion source
Min Wu and G. M. Hieftje	149	The effect of easily ionized elements on analyte emission efficiency in inductively coupled plasma spectrometry
Y. Madrid, J. M. Gutíerrez and C. Cámara	163	Reduction of interferences by hydride-forming and transition metals in continuous-flow mercury cold vapour generation using micellar media
H. Klinkenberg, T. Beeren and W. Van Borm	171	Multielement analysis using flow injection inductively coupled plasma mass spectrometry: analytical aspects of multielement determinations in highly concentrated solutions of phosphoric acid, sodium phosphate and sodium nitrate
N. V. Denisova and N. G. Preobrazhensky	185	Optogalvanic effect in radio frequency discharges
Jiansheng Wang, J. M. Carey and J. A. Caruso	193	Direct analysis of solid samples by electrothermal vaporization inductively coupled plasma mass spectrometry
R. J. Watling, H. K. Herbert, D. Delev and I. D. Abell	205	Gold fingerprinting by laser ablation inductively coupled plasma mass spectrometry
	i	*Notes for contributors*

No. 3

S. Hauptkorn and V. Krivan	221	Determination of silicon in boron nitride by slurry sampling electrothermal atomic absorption spectrometry
Liang Yan-zhong and Ni Zhe-ming	229	Atom release of Mn, Co, Ag and Tl in a graphite furnace atomizer with and without palladium modifier
R. Viswanathan, M. Sai Baba, D. D. Albert Raj, R. Balasubramanian, T. S. Lakshmi Narasimhan and C. K. Mathews	243	A mass spectrometric study of the dissociation of the gaseous diatomic tellurium molecule

E. B. Saloman 251 A resonance ionization spectroscopy/resonance ionization mass spectrometry data service. V—Data sheets for Ga, Mn, Sc and Tl

Analytical Note

Han Chuang and Shang-Da Huang 283 Direct determination of cadmium in sea-water with a graphite furnace atomic absorption spectrometer

Review

F. Leis and E. B. M. Steers 289 Boosted glow discharges for atomic spectroscopy—analytical and fundamental properties

i *Notes for contributors*

No. 4

M. Ødegård 327 Obituary—Aslak Kvalheim 1911–1993

V. A. Fassel 331 Obituary—Richard N. Kniseley 1930–1992

V. V. Kogan, M. W. Hinds and G. I. Ramendik 333 The direct determination of trace metals in gold and silver materials by laser ablation inductively coupled plasma mass spectrometry without matrix matched standards

B. Treiger, J. Injuk, I. Bondarenko, P. Van Espen, R. Van Grieken, L. Breitenbach and U. Wätjen 345 Non-linear mapping of microbeam proton-induced X-ray emission data for source identification of North Sea aerosols

G. Hermann, T. Udem, K. Hirokawa and H. Matsuta 355 Calculated transmission line structures of a Cu coherent forward scattering resonance monochromator (CFSRM)

E. G. Su, A. I. Yuzefovsky, R. G. Michel, J. T. McCaffrey and W. Slavin 367 Linearization of calibration curves of manganese, copper, silver, thallium and chromium in Zeeman graphite furnace atomic absorption spectrometry

C. M. M. Smith and J. M. Harnly 387 Sensitivities and detection limits for graphite furnace atomic absorption spectrometry using a continuum source and linear photodiode array detection

R. W. Fonseca, K. I. Wolfe and J. A. Holcombe 399 Mechanisms of vaporization for Cr using electrothermal atomization

Spectrochimica Acta Reviews

A. Bengtson 411 Quantitative depth profile analysis by glow discharge

i *Notes for contributors*

No. 5

R. Wennrick and G. Werner	431	Obituary—Prof. Dr Klaus Dittrich 1938–1993
J. P. Byrne, D. C. Grégoire, D. M. Goltz and C. L. Chakrabarti	433	Vaporization and atomization of boron in the graphite furnace investigated by electrothermal vaporization inductively coupled plasma mass spectrometry
N. Hadgu and W. Frech	445	Performance of side-heated graphite atomizers in atomic absorption spectrometry using tubes with end caps
S. L. Tong and K. S. Chin	459	Simultaneous multielement graphite furnace atomic absorption measurements using a photodiode array detector
Yu. M. Smirnov	469	Extended classification of holmium spectral lines using data obtained in crossing beams
J. F. Camuña-Aguilar, R. Pereiro-Garcia, J. E. Sánchez-Uría and A. Sanz-Medel	475	A comparative study of three microwave induced plasma sources for atomic emission spectrometry—I. Excitation of mercury and its determination after on-line continuous cold vapour generation
		Technical Note
S. K. Luo and H. Berndt	485	Sample introduction in ICP spectrometry by hydraulic high-pressure nebulization

Spectrochimica Acta Electronica

D. S. Hanselman, N. N. Sesi, M. Huang and G. M. Hieftje	495	The effect of sample matrix on electron density, electron temperature and gas temperature in the argon inductively coupled plasma examined by Thomson and Rayleigh scattering
A. A. Ghazi, S. Qamar and M. A. Atta	527	Uranium spectra in the ICP
		Research Note
T. K. Starn and G. M. Hieftje	533	*Gopher*: a unidirectional means of distributing spectrochemical resources

WINEFORDNER ISSUE

An Indefatigable Search for Innovation in Analytical Spectrochemistry

Dedicated to Jim Winefordner in recognition of his contributions to the field of Analytical Spectrochemistry

Co-Editors: NICOLÒ OMENETTO, WALTER SLAVIN and BENJAMIN SMITH

W. Slavin and N. Omenetto IX Preface

H. V. Malmstadt 1147 James D. Winefordner as a student

B. Smith 1151 A profile of Jim Winefordner including a bibliography and a list of co-workers

J. Winefordner 1205 Personal views and motivations of a teacher and a scientist

T. S. West 1209 Tribute to Professor J. D. Winefordner

K. Fuwa 1211 My memory of spectroscopy in the U.S.A.: an exciting era of atomic emission, atomic absorption and atomic fluorescence

L. de Galan 1221 Survival in atomic spectrometry

T. Vo-Dinh 1225 Winefordner and molecular spectroscopy—The man and his legacy

Fundamental studies and analytical applications of inductively coupled plasma–optical emission spectrometry (ICP–OES) and mass spectrometry (ICP–MS)

D. G. J. Weir and M. W. Blades 1231 The response of the inductively coupled argon plasma to solvent plasma load: spatially resolved maps of electron density obtained from the intensity of one argon line

D. Pollmann, F. Leis, G. Tölg, P. Tschöpel and J. A. C. Broekaert 1251 Multielement trace determinations in Al_2O_3 ceramic powders by inductively coupled plasma mass spectrometry with special reference to on-line trace preconcentration

N. N. Sesi, A. MacKenzie, K. E. Shanks, P. Yang and G. M. Hieftje	1259	Fundamental studies of mixed-gas inductively coupled plasmas
Hongsen Niu and R. S. Houk	1283	Langmuir probe measurements of the ion extraction process in inductively coupled plasma mass spectrometry—I. Spatially resolved determination of electron density and electron temperature
S. R. Koirtyohann	1305	Precise determination of isotopic ratios for some biologically significant elements by inductively coupled plasma mass spectroscopy
J.-M. Mermet	1313	Quality of calibration in inductively coupled plasma atomic emission spectrometry
Sang-Ho Nam, W. R. L. Masamba and A. Montaser	1325	Helium inductively coupled plasma–mass spectrometry: studies of matrix effects and the determination of arsenic and selenium in urine
R. E. Sturgeon and D. C. Grégoire	1335	Electrothermal vaporization inductively coupled plasma mass spectrometric detection of As, Sb, Se, Bi and Sn following preconcentration by *in situ* collection of their hydrides
E. H. van Veen, S. Bosch and M. T. C. de Loos-Vollebregt	1347	Spectral interpretation and interference correction in inductively coupled plasma mass spectrometry
N. André, C. Geertsen, J.-L. Lacour, P. Mauchien and S. Sjöström	1363	UV laser ablation optical emission spectrometry on aluminum alloys in air at atmospheric pressure
H. Falk	1373	Some theoretical considerations on the physical limitations of atomic beam time-of-flight mass spectrometry

The use of lasers in analytical spectroscopy: theoretical considerations and novel applications

A. Marunkov, N. Chekalin, J. Enger and O. Axner	1385	Detection of trace amounts of Ni by laser-induced fluorescence in graphite furnace with intensified charge coupled device
N. Chekalin, A. Marunkov and O. Axner	1411	Laser-induced fluorescence in graphite furnaces under low pressure conditions as a powerful technique for studies of atomization mechanisms: investigation of Ag
M. A. Bolshov, S. N. Rudnev and J. Brust	1437	Analytical characterization of laser excited atomic fluorescence of bismuth

M. A. Bolshov, S. N. Rudnev, J.-P. Candelone, C. F. Boutron and S. Hong	1445	Ultratrace determination of Bi in Greenland snow by laser excited atomic fluorescence spectrometry
M. Anderle, P. Lazzeri, L. Moro, P. Benetti, M. Rossella and G. Queirolo	1453	Investigation on laser ablation of InGaAs by means of resonance ionization and surfaces analysis spectrometries
H. Groll, Ch. Schnürer-Patschan, Yu. Kuritsyn and K. Niemax	1463	Wavelength modulation diode laser atomic absorption spectrometry in analytical flames
S. Berniolles, Zhiqiang Wu and W. G. Tong	1473	Diode laser-based nonlinear degenerate four-wave mixing analytical spectrometry
Zhiqiang Wu, Jinying Liu and W. G. Tong	1483	Sensitive absorbance measurement method based on laser multi-wave mixing
P. Ljungberg, D. Boudreau and O. Axner	1491	Full temporal density-matrix treatment of dual wavelength, arbitrary bandwidth, pulsed laser excitation of atoms with degenerate states in high collisional media
O. I. Matveev and N. Omenetto	1507	Anomalous spatial distribution of temporal and spectral behaviour within a pulsed dye laser beam
N. Omenetto and O. I. Matveev	1519	Time-resolved fluorescence as a direct experimental approach to the study of excitation and ionization processes in different atom reservoirs
G. C. Turk, Lijian Yu and S. R. Koirtyohann	1537	Laser-enhanced ionization spectroscopy of sodium atoms in an air–hydrogen flame with mass spectrometric detection
J. B. Simeonsson and R. C. Sausa	1545	Trace detection of ambient brominated compounds by laser-induced photofragmentation/ fragment detection spectrometry
T. Whitaker and G. Bekov	1557	Field ionization of alkali metal Rydberg states: application as an ultraviolet radiation detector with absolute wavelength calibration
G. A. Petrucci, D. Imbroisi, B. W. Smith and J. D. Winefordner	1569	Detection of OH in an atmospheric pressure flame via laser enhanced ionization of indium

Atomic absorption and emission spectrometry

P. Hannaford	1581	The oscillator strength in atomic absorption spectroscopy
R. W. Fonseca, L. L. Pfefferkorn and J. A. Holcombe	1595	Comparisons of selected methods for the determination of kinetic parameters from electrothermal atomic absorption data

B. V. L'vov, L. K. Polzik, A. V. Borodin, P. N. Fedorov and A. V. Novichikhin	1609	Precision and detection limits in Zeeman graphite furnace atomic absorption spectrometry
E. Voigtman, A. I. Yuzefovsky and R. G. Michel	1629	Stray light effects in Zeeman atomic absorption spectrometry
A. I. Yuzefovsky, E. G. Su, R. G. Michel, W. Slavin and J. T. McCaffrey	1643	Newton approximation method for linearization of calibration curves in Zeeman graphite furnace atomic absorption spectrometry
G. Hermann, B. Kling and B. Koch	1657	Multi-element determination with solid sampling by laser ablation using electrothermal atomisation and continuum source coherent forward scattering spectrometry
Yan Y. Zong, P. J. Parsons and W. Slavin	1667	Background overcorrection problems for lead in the presence of phosphate with various metals in Zeeman graphite furnace atomic absorption spectrometry
M. S. Epstein, G. C. Turk and L. J. Yu	1681	A spectral interference in the determination of arsenic in high-purity lead and lead-base alloys using electrothermal atomic absorption spectrometry and Zeeman-effect background correction
G. van Dalen and L. de Galan	1689	Direct determination of particulate elements in edible oils and fats using an ultrasonic slurry sampler with graphite furnace atomic absorption spectrometry
K. Dittrich✠, T. Franz and R. Wennrich	1695	Determination of mercury by furnace atomic nonthermal excitation spectrometry
C. P. Calloway Jr and B. T. Jones	1707	Atomic absorption spectrometry with a flame emission source
T. Kántor	1717	Atomization efficiencies in halocarbon-loaded acetylene–air flames—I. Monochlorides of readily volatilized elements
T. Kántor and L. Ernyei	1733	Atomization efficiencies in halocarbon-loaded acetylene–air flames—II. Formation of dihalides and combined effects on vaporization and gas phase atomization processes

Diagnostic studies and analytical applications of glow discharges

P. H. Ratliff and W. W. Harrison	1747	The effects of water vapor in glow discharge mass spectrometry
S. G. Schroeder and G. Horlick	1759	Evaluation of a hollow cathode atomic emission source designed for continuous solution sample introduction

Zhubiao Zhu and E. H. Piepmeier 1775 Optogalvanic and optopotential signals in a glow discharge reveal electrode coupling effects

Zhubiao Zhu and E. H. Piepmeier 1787 Studies of mechanisms in glow discharge oscillations
